Samantha,

Please find attached Kathleen and Karen's revisions and responses to your comments. Let us know if you have any questions or additional/remaining comments. We have several questions related to BaP...

Vince, will you also be reviewing the summary and response document?

Samantha will you be reviewing the Tox Review? We are trying to gauge when to send the documents for tech edit.

Finally, I sent a trimmed down charge last week. Who will be reviewing that piece?

Im out starting tomorrow, but Martin, Karen, and Kathleen are available to discuss.

Thanks,
Jamie

Subject: RE: FOR YOUR REVIEW-Benzo[a]pyrene ERD draft

Hi all,

I was able to read through the response to public comments last week and have incorporated my edits and comments in the attached. I didn't get a chance to read through the larger summary of the public comments to do a compare but rather read the response document as a standalone. This was one of the best response documents I have reviewed since working in IRIS. Well done!!!

I will be out of the office next week but will be happy to discuss any questions or concerns you have with my edits/comments when I return.

Congrats!

Thanks,
Samantha

Subject: FOR YOUR REVIEW-Benzo[a]pyrene ERD draft

Vince and Samantha,

Please find attached the ERD draft and Response to Major Science Comments for benzo[a]pyrene. Both clean and compare (to the public comment draft) redlines are included. The Tox Review is in an "unformatted" version. We are having difficulties with HERO making Word crash so we have "turned HERO off". Following your review we will send the document to TIS for debugging and then check all links. We also need to add HERO links to the preamble, but will wait for your review before we have an SSC work on that task. Also, there are a couple comment bubbles where we would like management to weigh in on text/decisions (i.e., scoping info). I'd like to thank Kathleen, Martin, and Karen for all the hard work. There were an extensive number of comments to comb through. Its a really good Tox Review and we should be proud.

Jamie

Also, the public comments can be found on the share drive at
